Station Madras, *Dated the* 4th December, 1941.

From (Name) P.H. Rama Reddi, Esq., I.A.S.,
(Designation) Director of Agriculture,

To The Secretary to the Government of Madras,
Development Department.

Sir,

Reference.- G.O.No.1033, Public Works, dated the 24th April, 1941.

I have the honour to request that permission may kindly be accorded for utilizing the old engine shed at the Agricultural Research Station, Hagari, for storing provisions for the members of the staff working at the station and collecting a nominal rent of rupee one from the secretary of the stores.

2. The Agricultural Research Station, Hagari, is eleven miles from Bellary, the nearest town, and all the provisions required by the staff working in the station are to be got from Bellary. The residents at the station about nineteen in number, all officials employed in the Farm, are now getting provisions worth about Rs.300/- every month from Bellary on a -- private co-operative basis. A registered society has not been formed, as the membership and the total transactions in a month are small. A room is required by the members for storing pro-

provisions, as all of them cannot be distributed to the members at a time. It is also necessary to stock urgent and unforseen requirements of the staff, as it is not possible to go to Bellary for each and everything. This store will be one of the minor services essential to the station and greatly add to the amenities of the place. It will be in charge of the secretary elected by the members in a general body meeting. The Superintendent Dry Farming Station, will be responsible for the collection of the rent on the building, as long as it is used for the purpose.

3. The shed in question was constructed in 1917 for installing an oil engine at the station. In 1937, the engine went out of order and a new engine was install near the rest house at the farm. The old engine was sold in auction in 1939 and since then the engine shed has been vacant. It has a plinth area of 209 square feet and its internal dimensions are 12' x 10'. It is a stone walled zinc sheet roofed small shed, having no conveniences for residential purposes. It is not borne on the Registers of the Public Works Department. The capital cost of the building is as follows:-

Cost of building	Rs.800/-
Special repairs executed in 1938	Rs. 84/-
Total	Rs.884/-
